SUMMARY

AI product builder with 25 years in restaurants, including 15+ years as owner of a 13-location chain. Translates operating needs into specifications, workflows, and production applications using AI coding agents. Shipped a sales and support CRM running approximately 20 AI agents, with human approval on every customer-facing message. U.S. Marine Corps veteran.

APPLIED AI AND RESTAURANT TECHNOLOGY

Cobblestone Restaurant Solutions

June 2025 – Present

Founder and Product Builder | Evansville, IN

Cobblestone CRM

- Designed and shipped an AI-enabled sales and support CRM in about seven weeks using Claude Code and Python/FastAPI; the production system includes 315 API endpoints and 51 database tables.
- Developed agents for lead qualification, follow-up, proposals, research, sales coaching, and data cleanup; eight run daily and produce automated briefings.
- Required human approval for every customer-facing email, text, and proposal, with review through the dashboard or a Telegram bot.
- Automated local prospect discovery and scoring across a seven-stage sales pipeline, and consolidated POS and loyalty support from email, web forms, and in-app chat into one queue.

Cobblestone POS | cobblestonepos.com | Demos: youtube.com/@CobbleStonePos

- Built a multi-tenant restaurant POS using Node.js/Express, Firebase Cloud Functions, Firestore, and Next.js; deployed in production at Cobblestone Creamery.
- Expanded the platform with online ordering, a merchant site, digital menu boards, and DoorDash integration.
- Built a tool-using AI agent inside the production POS that answers owners' sales questions, reads food-cost and inventory data, and walks staff through problems mid-shift by querying live shop data instead of canned reports.
- Designed a bar inventory module with sales-based inventory depletion, supplier views, REST APIs, and a catalog of approximately 600 drinks.

Cobblestone Perks | cobblestoneperks.com

- Developed a loyalty platform where guests check in and earn rewards at participating restaurants.
- Created an owner-facing AI marketing agent that plans a full month of restaurant marketing in under an hour and supports email, text, and social campaigns from one place.

Cobblestone Galley and Barge Food Supply

- Build food-management software for barge and towboat galleys, covering inventory, PAR levels, purchasing, reporting, and chef-to-captain approval.
- Developed an offline-first application with React, TypeScript, and Supabase, and deployed it to Android through Capacitor.
- Coordinate parallel AI-assisted development sessions using written handoffs, decision logs, and scoped commits.

ADDITIONAL PRODUCT DEVELOPMENT

The Owner's Notebook and Behind the Ticket

June 2025 – Present

Creator | theownersnotebook.com

- Built an automated publishing pipeline for restaurant-owner guides, calculators, and Excel worksheets using Python/openpyxl and a custom static-site build.
- Publish Behind the Ticket in print and web editions; currently developing metered membership, CRM lead capture, and AI-assisted social publishing.

BUSINESS LEADERSHIP AND OPERATIONS

Cobblestone Creamery2026 (sold)

Owner-Operator | Evansville, IN | cobblestonecreamery.com

- Built and operated the shop through its sale while developing its custom POS, loyalty program, CRM, and SMS marketing tools.
- Resolved Twilio A2P 10DLC registration issues by diagnosing campaign rejections, creating an opt-in proof page, and automating fixes and redeployment.

Spudz N Stuff2006 – 2021

CEO and President | Evansville, IN

- Started with \$10,000 and grew Spudz N Stuff into a 13-location restaurant chain spanning three states, operating the business for more than 15 years.
- Managed menu planning, food costs, purchasing, staffing, P&L, budgets, forecasting, marketing, and customer and vendor relationships.

ADDITIONAL EXPERIENCE

Hahn Kiefer Real Estate Services2018 – 2026

Distressed and Investment Property Specialist. Closed 51 deals in 2024, ranking first in the office for sales. Specialized in distressed properties and negotiations with banks and lenders.

Rent Depot2024 – 2026

Rental Property Inspector and Marketing Specialist. Managed inspections, listing photography, and rental turnover using zInspector, AppFolio, and LeadSimple.

SCORE2022 – 2025

Vice President and Business Mentor. Advised small-business owners on planning, marketing, and financial strategy, and led workshops and webinars.

U.S. Marine Corps1998 – 2001

Corporal, Microwave Systems Operator/Maintainer. Operated, maintained, and troubleshot microwave communications systems at Cherry Point, NC.
